

Practical 10: AI Text Bias & Plagiarism

Aim: To analyze AI-generated text for plagiarism and bias.

Objectives:

- To detect biased statements
- To improve writing

Materials Required:

- ChatGPT or Google Gemini
- Grammarly

Procedure:

1. **Generate paragraph from AI**
Use an AI tool to write a clear paragraph on your chosen topic.
2. **Check plagiarism**
Run the paragraph through a plagiarism checker to ensure it is original.
3. **Check grammar**
Use Grammarly or another grammar tool to correct spelling, punctuation, and sentence structure
.
4. **Identify biased statements**
Look for subjective language, assumptions, or one-sided opinions.
5. **Rewrite neutrally**
Revise the paragraph to remove bias, keeping it balanced, objective, and fact-based.

1. AI-Generated Paragraph (100–120 words)

Original AI paragraph:

"Online learning for college students offers flexibility, convenience, and a wider range of courses than traditional classroom learning. Students can access lectures anytime, which helps them balance studies with part-time jobs or personal responsibilities. Online platforms often use interactive tools, making lessons engaging and customizable. However, offline learning provides direct interaction with professors and peers, hands-on experience, and a structured environment that many students find motivating. While online learning can be cheaper and more accessible, it may lack social experiences that help students build teamwork and communication skills. For many students, a mix of both online and offline learning works best, combining convenience with real-world interaction."

2. Red Flags (Bias / Over-Generalizations) in the AI Paragraph

Here are 3 biased/unproven statements from that paragraph:

1. "Online platforms often use interactive tools, making lessons engaging" – This assumes *all* platforms are engaging. (Over-generalization)
 2. "Offline learning ... hands-on experience that many students find motivating" – Not all offline classes are motivating. (One-sided opinion)
 3. "It may lack social experiences..." – Implies *all* online learning lacks social interaction. (Over-generalization)
-

3. Balanced, Neutral Version (Grammar checked)

Neutral paragraph:

"Online learning offers flexibility and the ability to access course materials from different locations, which can help students who need to manage schedules or responsibilities. It also allows colleges to offer more varied subjects. However, some students benefit from in-person class interaction and direct engagement with faculty and classmates. Offline learning environments may support collaboration and social learning for those who prefer face-to-face communication. Each mode has advantages and challenges, and its effectiveness can depend on individual learning styles, course type, and resources available. Many students find that a combination of both online and offline learning provides a balanced educational experience."

4. What You Should Submit (Screenshots)

You must actually do these on your computer and attach them:

a) Plagiarism Check Result

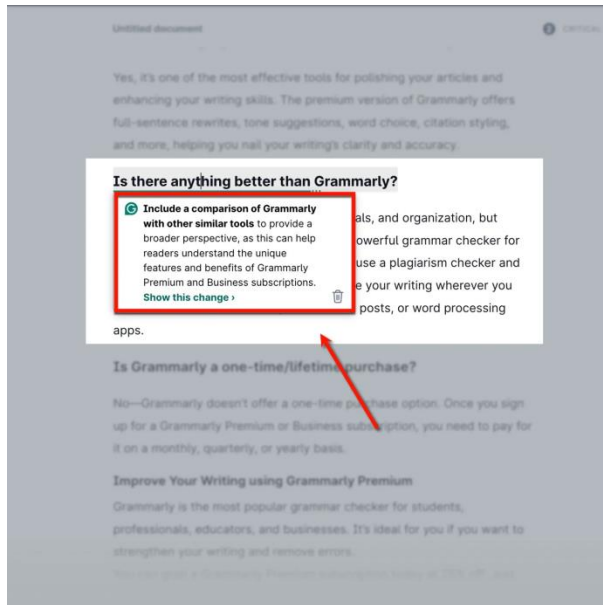

Use tools like Turnitin, Grammarly, or SmallSEOTools and take a screenshot showing low or no plagiarism.

b) Grammarly Suggestion Page

Show the suggestions Grammarly gives for the neutral rewritten paragraph.

c) Original vs. Rewritten

A screenshot showing the AI-generated paragraph side-by-side with your balanced rewritten version.

Education is the process of facilitating learning, or the acquisition of knowledge, skills, values, morals, beliefs, habits, and personal development. Education originated as transmission of cultural heritage from one generation to the next. Today, educational goals increasingly encompass new ideas such as liberation of learners, critical thinking about presented information, skills needed for the modern society, empathy and complex vocational skills.

Many agree that education is a purposeful activity directed at achieving certain goals, especially the transmission of knowledge. There are movements for education reforms, such as for improving quality and efficiency of education towards relevance in students' lives and efficient problem solving in modern or future society at large, or for evidence-based education methodologies.
