

Practical 11: Compare AI vs Human Writing

Aim:

To compare AI-generated content with student-created content.

Objectives:

- To identify differences in writing
- To understand AI limitations

Materials Required:

- AI tool (ChatGPT, Gemini, etc.)

Procedure:

1. Write paragraph manually

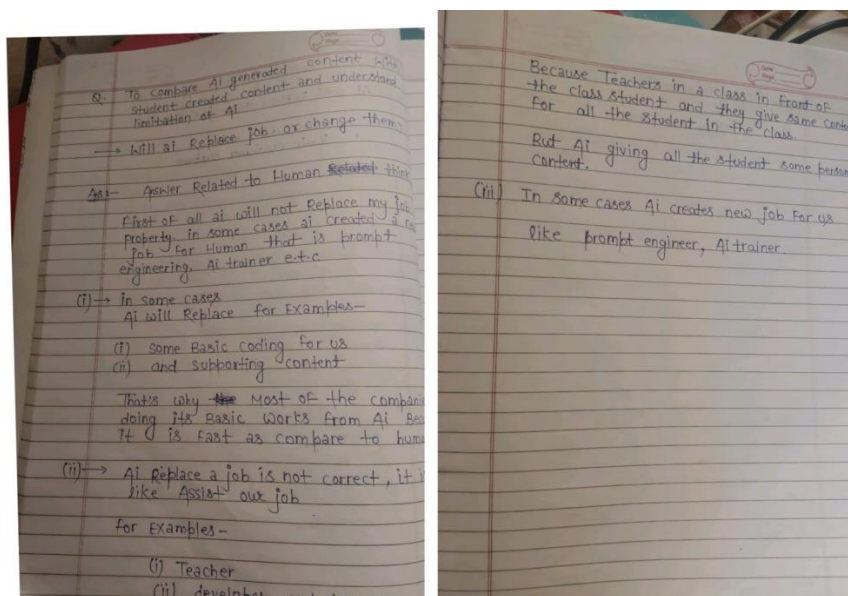

Write a paragraph yourself using your own ideas and words on a chosen topic.

2. Generate paragraph using AI

Use an AI tool to create a paragraph on the same topic.

3. Create comparison table

Make a table showing both paragraphs side by side. Compare style, clarity, tone, and content differences.

b) AI-Generated Paragraph

(Written by ChatGPT / AI tool)

Artificial Intelligence is expected to significantly impact the job market by automating routine and repetitive tasks. While some jobs may be reduced due to automation, AI is more likely to change the nature of work rather than completely replace human workers. Many professions will evolve as AI tools assist employees in improving productivity and efficiency. Jobs that require creativity, emotional intelligence, problem-solving, and human interaction will continue to rely on people. At the same time, new careers related to AI technology, data analysis, and system maintenance will be created. Overall, AI will reshape industries and job roles, making adaptation and continuous learning essential for the workforce.

c) Comparison Table

(Write this table in your practical copy)

Human-Generated Content	AI-Generated Content
Shows personal understanding and simple language	Uses more formal and polished language
Includes student's own opinions and reasoning	Neutral and generalized viewpoint
May have minor grammatical issues	Grammatically correct and well-structured
