

Practical 12: NotebookLM Project

Aim:

To create revision notes using NotebookLM.

Objectives:

- To generate a study guide
- To create flashcards for quick revision

Materials Required:

- NotebookLM

Procedure:

1. **Create NotebookLM project**
Start a new project in NotebookLM to keep all your resources and AI outputs in one place.
2. **Upload two resources**
Add two documents or sources so the AI can analyze them.
3. **Generate study guide**
Use NotebookLM to create a structured study guide summarizing key points from the resources.
4. **Generate flashcards**
Automatically make flashcards highlighting important facts, terms, or ideas.
5. **Review accuracy**
Check the summaries and flashcards to ensure the information is correct and complete.
6. **Take screenshots**
Capture screenshots of the study guide and flashcards for your submission.
