

Practical 6: Create Digital Identity – LinkedIn

Aim: To demonstrate the creation and management of your digital identity.

Objectives:

- To create a professional online profile
- To update personal information

Materials Required:

- LinkedIn account

Procedure:

1. Create LinkedIn profile

Sign up on LinkedIn with your email and make a new profile. This helps you start professional networking.

2. Add photo, bio, education

Upload a clear profile photo, write a short bio about yourself, and fill in your education details.

3. Add skills

List your technical and soft skills in the “Skills” section to make your profile stronger.

4. Create a simple post

Click “Start a Post” and write a short update about “My Learning Journey in Digital Literacy.”

5. Change privacy settings

Go to Settings & Privacy. Choose who can see your posts and who can message you.

About

I'm a motivated student with a strong interest in programming and problem-solving. Currently learning C, C++, Data Structures & Algorithms (DSA), and JavaScript, I enjoy writing logical code and understanding how efficient solutions are built.

I focus on strengthening my core concepts, practicing DSA problems, and building a solid foundation in programming. I believe consistency, discipline, and curiosity are essential for growth in the tech field.

I'm open to learning opportunities, coding communities, and collaborations that help me grow as a better programmer.

Skills:

- C Programming
- C++
- Data Structures & Algorithms (DSA)
- JavaScript (Basics)
- Problem Solving
- Logical Thinking
