

Practical 7: Using Google Drive / OneDrive

Aim

To upload, organize, and share files using Google Drive or OneDrive.

Objectives

- To manage files online
 - To share files securely
-

Materials Required

- Google Drive / OneDrive account
-

Procedure

1. Create a new folder

Open Google Drive or OneDrive and create a new folder named “**Unit 3 Practical Work.**” This folder will store all files related to the practical work.

2. Upload files

Click on the **Upload** option and select three different files such as a PDF file, an image file, and a document file from your device.

The files will be uploaded into the main folder.

3. Create subfolders

Inside the main folder, create three subfolders named **Notes**, **Images**, and **Assignments**.

Move the files into their correct subfolders to keep the folder organized.

4. Share the main folder

Right-click on the “**Unit 3 Practical Work**” folder and click on **Share**.

Set the permission to **View only** and share it with your teacher so the files can be viewed but not edited.
